

Python While Loop Practice Worksheet

20 randomized coding questions • Each question requires user input where applicable

1. Keep asking for a number until the user enters an even number.
2. Find the sum of numbers divisible by 3 between 1 and N.
3. Keep taking numbers and find their average until 0 is entered.
4. Find the largest number less than N that is divisible by 7.
5. Print all numbers between two given values that are divisible by 4.
6. Find the largest number entered by the user until 0.
7. Print all prime numbers from 1 to N.
8. Count how many numbers from 1 to N are divisible by 3.
9. Print numbers from 1 to 100 that are divisible by 3 and 5.
10. Print numbers from 1 to 100 that are divisible by 5.
11. Keep asking for a password until the correct password is entered.
12. Find whether a number is prime using a while loop.
13. Keep asking the user whether they want to continue until they enter "no".
14. Keep taking numbers from the user until the user enters 0.
15. Count how many positive numbers the user enters until -1.
16. Keep taking numbers and find their sum until 0 is entered.
17. Find the smallest number entered by the user until 0.
18. Count how many numbers from 1 to N are divisible by both 3 and 5.
19. Count positive and negative numbers entered by the user until 0.
20. Print numbers from 1 to N that are not divisible by 2.
